A purpose-built platform to manage everything associated with assessing and maintaining compliance with the **United Kingdom** General Data Protection Regulation (UK-GDPR).

UK GDPR Compliance Made Easy

UK GDPR compliance doesn't have to be complicated. Compliance Manager walks you through a set of easy-to-understand questions, automatically scans to detect personal data, and creates all the documentation and reports you need to demonstrate compliance with the UK GDPR.

UK GDPR-Mandated Reports

Compliance Manager automatically formats the data it collects into UK GDPR-mandated reports, including auditor checklists, Data Protection Impact Assessment (DPIA) and GDPR Evidence of Compliance.

Achieve Compliance and Avoid UK GDPR Fines

UK GDPR imposes strict fines for non-compliance; up to 4 percent of the organization's global turnover or £17.5 million, whichever is larger. Compliance Manager takes the complexity out of GDPR and enables you to demonstrate continuous compliance, protecting you and your clients from these hefty fines.

STAY AHEAD OF THE REGULATORS

If you or your clients collect or process the personal data of individuals located inside the United Kingdom (UK), you are subject to GDPR's strict regulations. Managing data collection, including opt-ins, opt-outs and deletion upon request, is only one small part of the regulation. With Compliance Manager by your side, you don't need to memorize all the details or be a compliance expert.

NEW SERVICES FOR MSPs

Compliance Manager supports the UK and the EU versions of GDPR. Both of these laws protect the data of their residents, regardless of where that data is collected or processed in the world. If you are an MSP, there's a good chance you have clients with international operations, and if so, you can – and should – start offering GDPR Compliance-as-a-Service.

ROLE-BASED FOR INTERNAL IT

Compliance Manager's role-based platform makes it easy to involve all your organisation's stakeholders in the process...including technicians, end-users, managers and auditors. In addition to the GDPR compliance management, you can use the same platform to generate evidence of compliance with your own corporate security standard.

Request a Demo today and discover the advantages of Compliance Manager — the purpose-built compliance process automation platform for MSPs.
