Are you looking for a way to stand out from the competition and show your clients the true value of your services? Set them up to receive regular Executive Reports that can be automatically generated and distributed by Network Detective Pro with your branding. These customizable, easy-to-understand reports clearly communicate network health and performance in a way that even the most non-technical clients can understand.

The Executive Reports cover many aspects of each client IT environment that you manage, all from one place. That makes it easy to create clear and concise reports that you can use to keep your clients top-of-mind about the value you are delivering every day, week, and month. The reports can be sent to individuals or groups at whatever frequency you decide. Fresh data is collected prior to each report, and you have the option to preview the results and adjust your network prior to shipping over to your clients to review.

Here are some of the executive reports available:

## EXECUTIVE Summary

The Executive Summary report displays the potential risk across standard business categories as well as the potential liabilities discovered within the network. This report can be used to present a high-level overview of your customers IT environment. This is helpful, because it provides an at a glance overview of the overall health of IT environment you manage that you can relay to your clients.

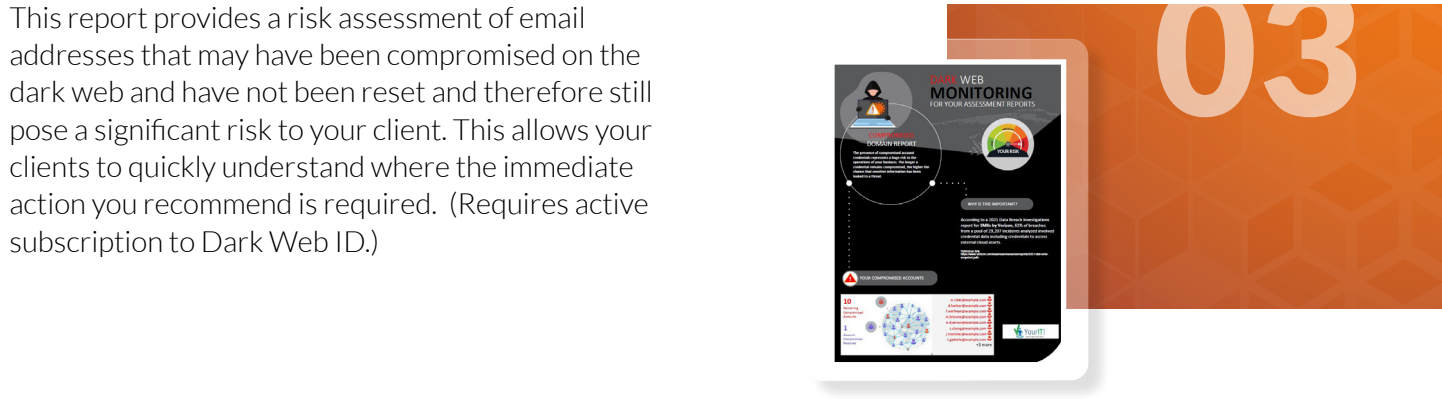

## DATA BREACH Liability Summary

Use this infographic to demonstrate the financial exposure levels personal identifiable information (PII) risks on your clients' network. It highlights potential data breach liabilities and provides you the proper ammunition to recommend how to mitigate them and use your company to do so. The report can also be used to demonstrate to your client the steps your technicians have taken to protect sensitive data and address potential vulnerabilities in their network.

## DARK WEB ID Scan Summary

This report provides a risk assessment of email addresses that may have been compromised on the dark web and have not been reset and therefore still pose a significant risk to your client. This allows your clients to quickly understand where the immediate action you recommend is required. (Requires active subscription to Dark Web ID.)

## PASSWORD Policies Summary

This report summarizes inconsistencies with computer password policies and provides a sample list of your client's computers that are not in compliance with those policies. Most often business have poor policy enforcement which poses a risk to your clients' IT infrastructure. The benefit in this report comes from the analysis of your client's password policies and the detailed recommendations you provide on how to improve them.

## OUTDATED MALWARE DEFINITIONS Monitoring Summary

This report provides a risk assessment of servers and computers running outdated security definitions. This forces your clients to quickly understand where immediate action is required.

## OUTDATED OPERATIONS Systems Summary

This report provides a risk assessment of computers and servers running an outdated operating system. This allows your clients to quickly understand the immediate action that you are suggesting is required. This report can be used to demonstrate to your clients the steps you are taking to keep their devices updated and secure.

## SERVER & WORKSTATION Aging Summary

This report analyzes the age of your clients' servers and provides you an opportunity to upsell additional services by providing recommendations on when to replace them. The age of hardware in your client's environment can directly affect your availability to perform at an optimal level of efficiency and effectiveness. This report can be used to demonstrate to your clients the steps being taken to maintain the health and performance of their servers.

## VULNERABILITIES SCAN Assessment Summary

The Vulnerability Scan Assessment Summary presents your latest scan results from VulScan. This single page infographic that you detail the severity of the vulnerabilities that you found. This report is useful in demonstrating to your clients the steps you have taken to identify and address vulnerabilities. (Requires active subscription to VulScan).

## COMPLIANCE BASELINE Assessment Summary

This single page infographic report presents results from the Rapid Baseline Assessment for communication and prospecting purposes. The Compliance Manager GRC Rapid Baseline Assessments allow MSP's to quickly identify gaps where your clients are not compliant with internal security policies or applicable laws or regulations. (Requires active subscription to Compliance Manager GRC).
